

DEVELOPING HEALTHY CHILDREN & FAMILIES

The pathway to a healthy life varies based on individual challenges – and the determinants of well-being extend beyond medical care to social and economic factors. By addressing abusive and unsafe environments, promoting positive behavior and fostering supportive conditions at home and in the community, United Way of Santa Cruz County is committed to providing resources that local children and families need to thrive.

OUR GOAL: Encourage healthy beginnings & choices for children & families, while improving access to health care services & preventative education.

Prevention → Change

Focused on prevention, as opposed to intervention, United Way of Santa Cruz County is taking steps to change the course for future generations of children and families. That means pursuing a holistic solution and removing obstacles to improving health by:

- Increasing access to dental, mental and medical care for all
- Improving safe and healthy living environments
- Reducing obesity rates by 10%
- Increasing awareness and knowledge to promote health

\$1 INVESTED in prevention → **\$7** SAVED on intervention
